Subject: RE: Call date Seismic Monitoring sub-group Aug 7 at 2CT

I was doing a little web surfing to find out more about the consortium our sub-group is part of, and found the States First post: <http://www.statesfirstinitiative.org/#!/States-Team-Up-to-Assess-Risk-of-Induced-Seismicity/c8t8/72D0196F-1DAB-4617-B446-B009A1D902FB>

If we are compiling information for states, then several sections of the EPA National Technical Workgroup draft report on Induced Seismicity may be a good starting point. (At the moment there are no proposed changes to these sections of the report as it nears, relatively speaking, final format.) Particularly the last appendix by USGS and the appendix on databases. That with the updates on the temporary array adoptions cover the background fairly well.

Attached is the latest agenda for the GWPC Annual Forum – Seattle, WA Oct 4-8.

The Induced Seismicity sessions will be Saturday afternoon and Sunday morning..

We hope to have discussions regarding the key issues the subgroup lands on in the Saturday session, as well as, your suggested technical presentations in the Sunday session covering issues you believe to be most useful to communicate out and/or gain knowledge for the benefit of the subgroup..

THANKS!

GWPC Induced Seismicity Working Group Review of:

Issues Regarding Seismic Monitoring of Earthquakes Associated with Oil and Gas Activities

1. Define the necessity of Monitoring ie. Why Bother?
2. Describe a minimum suite of sensors and data acquisition, what kind, areal coverage needed, etc.
3. Discuss the current status of Monitoring Capability, ie. Permanent Stations, deployable arrays, detection threshold, etc.
4. Share success stories and Frustrations.
5. Discuss possible solutions, including sources of funding, organizations to task with response, maintenance of response readiness, data repository development and maintenance, etc.
6. Decide what our next steps are.
